

“Water Treatment from A Masterpiece of Craftsmanship”

Rust Sentry™ Series

RUST SENTRY™ handles the problem of unsightly rust stains caused by dissolved iron present in the water of lawn sprinkling systems. RUST SENTRY™ precisely injects RS-100 (a liquid rust inhibitor directly into your lawn's sprinkling system as it operates. RS-100 neutralizes the dissolved iron's ability to cause staining to your home's paint, window fixtures, plants, and driveway. PROTECT your lawn furniture, automobiles, boats, trees and plants when breezes would carry potentially staining water.

Source water with corrosive low pH (acid/base) levels will cause green staining of porcelain fixtures, damage metal pipes, plumbing fixtures, hot water heaters, dishwashers and washing machines. The AQUATHIN RUST SENTRY™ RS35pH efficiently and accurately maintains a non-corrosive neutral pH.

Bacteria, musty and sulfur odors, brown coloration can all be present in well water. The AQUATHIN RS35CL injects a precise dosage of chlorine that, with proper contact time, will kill bacteria and eradicate odors and color and provide fresh clean water.

RS+, RS35PH and RS35CL are made of the finest materials to provide years of efficient water treatment... and No One Does It Better!

RUST SENTRY™ SERIES

SPECIFICATIONS :

★ CHEMISTRY FOR:

IRRIGATION	RS-100 is a liquid food grade phosphate designed to coat (sequester) iron and prevent its oxidation which causes unsightly orange and brown stains.
CLEANING STAINS	RS-550 is a mild dispersant that will dissolve away pre-existing iron and tannin stains from painted and concrete surfaces. Both RS-100 and RS-550 are safe, effective and inexpensive.
FERTILIZATING	RS-MASTER is a liquid or powder 6-6-6 fertilizer combination of primary and secondary plant foods metered directly through lawn sprinkler heads providing consistent application of essential nutrients to grass, plants, shrubbery and trees.
pH CONTROL	RSNaOH is sodium hydroxide, ordinary soda ash, in liquid form. The liquid form permits safe storage and easy refilling of the RS35pH as well as uniform blending and mixing. No possibility of dangerous thermal reactions associated with powdered soda ash.
GERMICIDE, Fe, Mn, H₂S, Algae, Color, Odor	RS35CL utilizes ordinary household brand bleach for safe and inexpensive disinfection and precipitation.

★ DIMENSIONS

RS-1516" W x 25" H	20 pounds
RS-35, RS35CL, RS35pH20" W x 32" H	28 pounds
RS-5522" W x 39" H	42 pounds

★ WARRANTY

Your AQUATHIN RUST SENTRY™ Series comes with a FULL ONE-YEAR WARRANTY for the pump and motor, and a FULL THREE-YEAR WARRANTY for the tank.

★ COMPONENTS

THE METERING PUMP has a heavy duty, impedance protected, insulated motor. The motor comes with a louvered motor cover for weather protection. The pump and motor is resistant to harsh ultraviolet rays. The pump and motor utilizes the positive displacement process for precision and consistent metering of all RS chemicals. Available in 115 or 230 volt.

THE STORAGE TANK is made up of high impact resistant, ultraviolet ray resistant polyethylene. Each tank has an easy-to-read level indicator and OPTIONAL raised stand for elevated protected mounting. Side mounting of the pump and motor provides for complete chemical availability. Each tank comes with a CHILD-PROOF LID COVERING.

RUST SENTRY™ systems available for commercial and industrial application, such as: condominium communities, shopping malls and golf courses.
